The City of Spruce Grove is committed to working towards a sustainable future through the integration of community, economic, and environmental considerations in all municipal operations. Along with changing the way we do business, contributing to sustainability as a municipality means developing programs that encourage residents to get involved as well.

The commuter transit program is an excellent example of that. 46% of the community's greenhouse gas emissions are related to transportation. By utilizing the transit service, there are fewer cars on the road, thus fuel use and emissions are reduced. These small changes in your daily life can have a big impact on the environment. You are doing something positive for the environment and for yourself reducing stress, saving money, and having a little more time to yourself.

Good for the environment, good for the community, and good for your wallet - how can you go wrong with that?

Thanks for doing your part and enjoy the ride!
